THE TEKNEK DESK TOP CLEAN MACHINE

teknek

The compact design of The Teknek Desk Top Clean Machine allows the operator to simultaneously clean both sides of the material exactly when it is required, true just in time cleaning at your fingertips. The unique design of the "cleaning engine" allows for the double sided cleaning of very thin materials.

The machine uses the proven Teknek elastomer contact cleaning rollers and Teknek pre-sheated adhesive roll, the most efficient cleaning engine and yield improvement system on the market. The elastomer rollers will lift dry unattached particles down to 1 micron in size and then transfer them to the pre-sheated reverse wound adhesive roll. When the Teknek adhesive is full of contamination a layer is easily removed and the roll is refreshed.

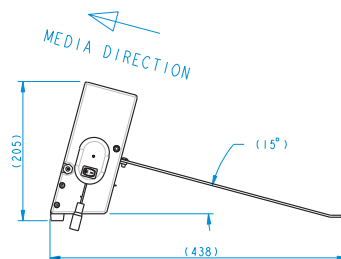

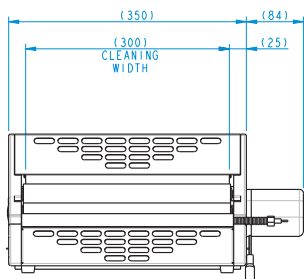

FEATURES

BENEFITS

Double sided cleaning	Simultaneous cleaning of both sides of the material
Pre-Sheated Adhesive Roll	Easy and safe to remove a layer of adhesive
Small footprint	Workstation or wall mounted
Variable speed settings	Integrate into any process
7 Kv Anti Static system	Greatly reduces risk of recontamination
Thin Film processing capability	The ability to process materials under 50 micron
Simple hand feed system	Cleans the material exactly when you need it

TECHNICAL SPECIFICATION

Available in two widths	150mm & 300mm
Mains voltage	100V-240V ~ 50/60Hz
