THE TEKNEK DCR ROLLERS AND PADS

teknek

The powerful combination of Teknek polymer rollers and Teknek adhesive Pads combine to create the Worlds most efficient hand operated contact cleaning system. Use them and experience immediate yield improvements in your manufacturing process.

Teknek rollers are currently used in the manufacturing of :- PCB's, flexible circuits, LCD's, touch panels, medical packaging, surface mount assembly, laminated glass and more.

The polymer rollers (manufactured by Teknek) have been engineered to remove dry unattached particles from any dry flat surface. Small particles down to 2 micron are gently removed by the roller and then transferred to the special adhesive pad. The adhesive on the pad has been carefully designed to ensure compatibility with the Teknek hand rollers, ensuring no cross contamination to the work piece.

FEATURES

BENEFITS

Different "power levels" of cleaning	A roller and pad to suit every application
Light weight ergonomic design	Easy to use for long periods
Dust is trapped in the adhesive pad	It can be analysed to find the root cause or source
Roller and adhesive are both highly engineered compatible products.	No cross contamination to the substrate being cleaned
Simple snap fit roller construction	Cleaning of the handle is simple - easy replacement of roller
"Wet out" of the polymer roller on the substrate	Ensures intimate contact, gently removing the contamination
Thick, even coat of adhesive on the pad	Holds large particles and lasts longer
Rollers and Pads manufactured by Teknek	Proven reliable technology that is available worldwide

TECHNICAL SPECIFICATION

Widths 6" / 150mm and 12" / 300mm

Roller types Panel, Film, F3 and ESD

Pad dimensions 331mm x 240 mm

CE compliant

Product specification subject to change.
